BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- ☐ **BLACK BORDERS**
- ☐ **IMAGE CUT OFF AT TOP, BOTTOM OR SIDES**
- ☐ **FADED TEXT OR DRAWING**
- ☐ **BLURRED OR ILLEGIBLE TEXT OR DRAWING**
- ☐ **SKEWED/SLANTED IMAGES**
- ☐ **COLOR OR BLACK AND WHITE PHOTOGRAPHS**
- ☐ **GRAY SCALE DOCUMENTS**
- ☐ **LINES OR MARKS ON ORIGINAL DOCUMENT**
- ☐ **REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY**
- ☐ **OTHER:** _____

IMAGES ARE BEST AVAILABLE COPY.

As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.

When a truly diverse community of users is considered, it is clear that a single interface, no matter how well designed, cannot accommodate everyone. Configuring an interface to match a particular user's requirements can be a demanding task. This paper focuses on the potential utility of *configuration agents* to support users with low initial levels of control, or low levels of knowledge about configuration. The relationship between configuration of systems by agents, user control, and ...

May 2002 **Proceedings of the 24th international conference on Software engineering**

Full text available: [pdf\(1.17 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Viewpoint-based Requirements Engineering (VBRE) is based on the fact that there is a multiplicity of stakeholders that take part in any requirements process. This will inevitably lead to conflicts and inconsistencies that, if adequately managed, can be used to improve the process, as they are sources of requirements. There comes a time in every VBRE process when different viewpoints need to be compared to find discrepancies (conflicts, inconsistencies). But in Requirements Engineering (RE) we also ...

November 2002 **Proceedings of the 2002 joint ACM-ISCOPE conference on Java Grande**

Full text available: [pdf\(214.97 KB\)](#)Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

There has been an increasing research interest in extending the use of Java towards performance-oriented programming for distributed and concurrent applications. Numerous research projects have introduced class libraries or language extensions for Java in order to support automatic management of locality, parallelism and load balancing which is almost entirely under the control of a runtime system and frequently results in critical performance problems. In previous work we described JavaSymphony ...
